

HABITAT AND ADAPTATION WORKSHEET

ACTIVITY 1

Complete the definitions of habitat and adaptations, using the words below:

Habitat: The natural home or environment of an _____, _____, or an organism.

Adaptations: An animal's special feature that helps them to better survive in their _____.

Environment

Animal

Plant

ACTIVITY 2

Connect the correct image of the habitat to its name:

URBAN (CITY)

RAINFOREST

OCEAN

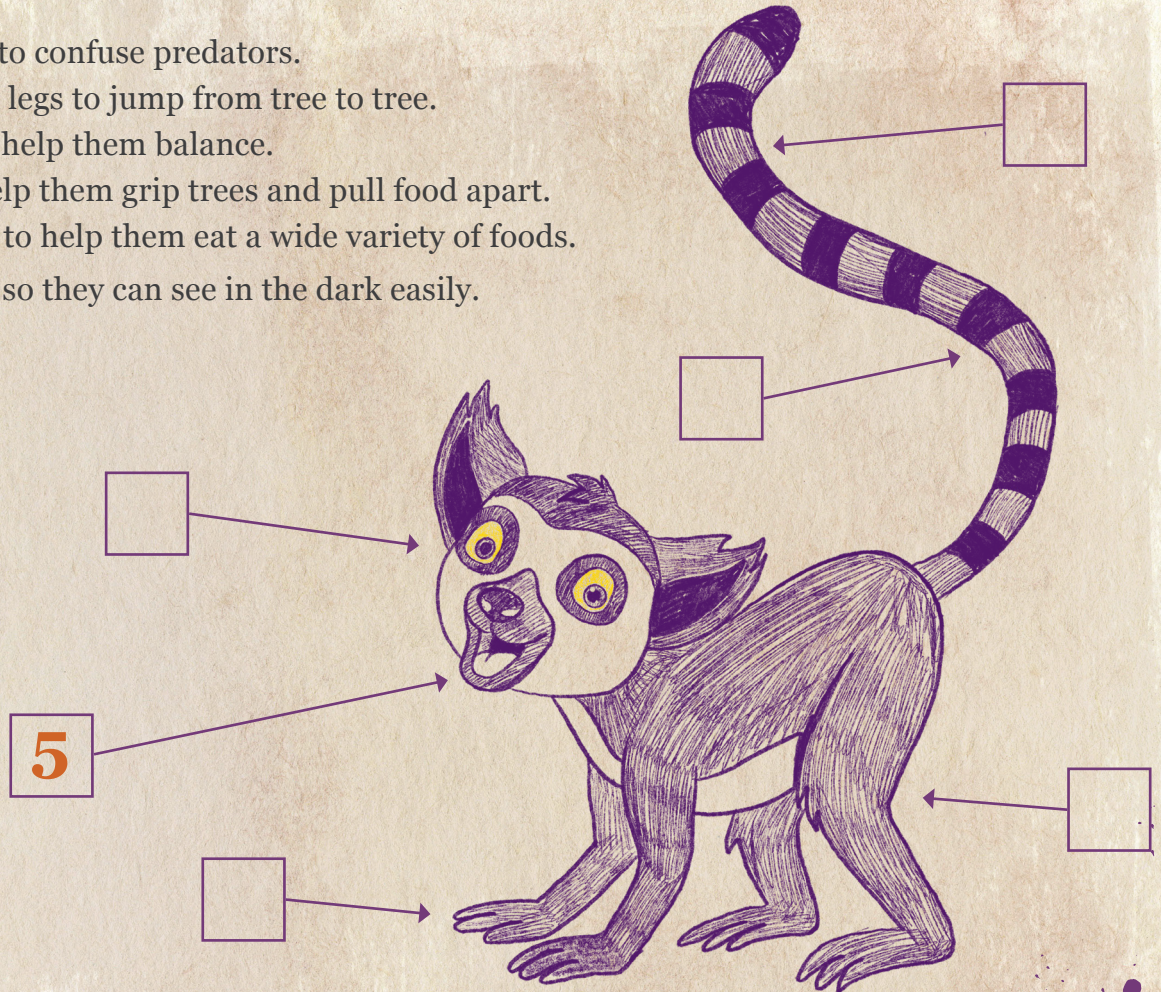

GRASSLAND

DESERT

ACTIVITY 3

Label the number of the adaptation that best suits each arrow on the lemur to survive in the Rainforest. One has been done for you as an example.

1. Striped tail to confuse predators.
2. Strong back legs to jump from tree to tree.
3. Long tail to help them balance.
4. Hands to help them grip trees and pull food apart.
5. Sharp teeth to help them eat a wide variety of foods.
6. Yellow eyes so they can see in the dark easily.

EXTENSION

List some more animals below that may live in other habitats such as the desert, grasslands, ocean and urban city.
