

# BUG HOTEL WORKSHEET

## STEP-BY-STEP GUIDE TO BUILDING YOUR BUG HOTEL

1. Pick out a variety of materials including bamboo canes, leaves, twigs and acorns.
2. Fill the top level with as many bamboo canes as you can. Make sure the bamboo canes have been positioned so the holes are facing the front.
3. Fill the bottom level with twigs, leaves, and acorns.
4. Make sure your materials are well filled and not going to fall out.

### EXTENSION

1. Attach a small amount of looped string to the back of the bug hotel.
2. Hang up your bug hotel at least a meter above the ground – Keep it in a warm spot and facing down slightly to make sure it doesn't get rain in.
